### 1 [The access control mechanism of a database computer \(DBC\)](#)

M. Jaishankar Menon, David K. Hsiao

 March 1980 **ACM SIGIR Forum , Proceedings of the fifth workshop on Computer architecture for non-numeric processing CAW '80**, Volume 15 Issue 2

Publisher: ACM Press

Full text available: pdf(1.10 MB)

 Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

The database computer (DBC) is a specialized back-end computer which is capable of managing data 1010 bytes in size and supporting known data models such as relational, network, hierarchical and attribute-based models. It is also perhaps the first database machine to have a built-in security mechanism for access control. At the outset, the security mechanism was made an integral part of the DBC design. This design philosophy not only allowed us to construct a ...

### 2 [Applications in logistics, transportation, and distribution: Manufacturing supply chain applications: investigation of influence of modeling fidelities on supply chain dynamics](#)

Jayendran Venkateswaran, Young-Jun Son, Boonserm Kulvatunyou

 December 2002 **Proceedings of the 34th conference on Winter simulation: exploring new frontiers WSC '02**

Publisher: Winter Simulation Conference

Full text available: pdf(302.71 KB)

 Additional Information: [full citation](#), [abstract](#), [references](#)

In this paper, a three-echelon supply chain model is analyzed to determine strategies to reduce the supply chain system dynamics. Uniqueness of this research stems from the use of multiple models with varying degrees of detail representing the same supply chain. The significance of a detailed supply chain model on the quality of result is made clear. Factors employed to build an abstract to a detailed model include: transportation and production delay, demand at the retailer, and production a ...

### 3 [How to do discretionary access control using roles](#)

Ravi Sandhu, Qamar Munawer

 October 1998 **Proceedings of the third ACM workshop on Role-based access control RBAC '98**

Publisher: ACM Press

Full text available: pdf(769.13 KB)

 Additional Information: [full citation](#), [references](#), [citations](#), [index terms](#)

### 4 [Special session on memory wall: Overcoming the "Memory Wall" by improved system design exploration and a link to process technology options](#)

Antonis Papanikolaou, Miguel Miranda, Francky Catthoor

 April 2004 **Proceedings of the 1st conference on Computing frontiers CF '04**

Publisher: ACM Press

Full text available: pdf(231.92 KB)

 Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Data transfer and storage issues "take the centre stage" in information and communication systems because of the increasing complexity and data dominance

typically associated to them. In this paper, we summarise a systematic methodology for the power critical storage modules such as local SRAMs. We focus on their memory organisation (access schedule and data assignment) together with an exploration of the effect that the interconnect technology may have on the energy consumed by these local memo ...

- 6 [Implementing a high-integrity executive using Ravenscar](#)  
Neil Audsley, Alan Burns, Andy Wellings  
March 2001 **ACM SIGAda Ada Letters**, Volume XXI Issue 1

**Publisher:** ACM Press

Full text available:  [pdf\(528.27 KB\)](#)

Additional Information: [full citation](#), [abstract](#)

This paper discusses the use of the Ravenscar profile in the implementation of an APEX-compliant high-integrity executive. In general, the Ravenscar profile was found to have enough expressive power to implement a large proportion of the executive. However, the lack of dynamic priorities and single item queues were problematic.

- 7 [An Introduction To DIAM Levels Of Abstraction In Accessing Information](#)  
Michael Levin  
December 1978 **Proceedings of the 1978 annual conference ACM 78**

**Publisher:** ACM Press

Full text available:  [pdf\(1.04 MB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

There has been a great deal of interest in information models that are independent of all considerations of implementation. But such models cannot be exploited to their fullest potential without a theory for modeling implementations and the mapping of information models into implementations. DIAM (Data Independent Access Model) is such a theory, describing implementations on several levels of abstraction and the mappings from level to level. This paper is a tutorial which provides the reader ...

- 8 [Innovation, management & strategy: An on-line purchasing and decision support system for distributed retail chain stores](#)  
Azwina M. Yusof  
March 2004 **Proceedings of the 6th international conference on Electronic commerce ICEC '04**

**Publisher:** ACM Press

Full text available:  [pdf\(449.20 KB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

This paper looks into how integrating on-line purchasing with inventory management system for distributed retail chain stores can automate and aid the process of decision-making in relation to on-line product sales and distribution. It extends the work done in [1], to include not only on-demand and automatic communication between the retail chain store's head office and point-of-sale (POS) outlets, but also to include on-line purchasing capabilities for home users. The application uses distributed ...

9 A software engineering experience in the management, design and implementation of a data secure system

David K. Hsiao

October 1976

**Proceedings of the 2nd international conference on Software engineering ICSE '76**

Publisher: IEEE Computer Society Press

Full text available:  pdf(739.30 KB)

Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

HSDMS (Highly Secure Data Management System) is a secure, on-line and multi-user experimental database management system developed on the Digital Equipment Corporation's PDP-10 computer system. It is a vehicle for testing new facilities and applications of data management and access control. Furthermore the development of HSDMS itself has been aimed at the outset as an exercise in software engineering management and control. In the first part of the paper, the software engineerin ...

**Keywords:** Access control, Authority item, Data independence, Data secure system, Data security, Parallel access, Prompting, Security atom, User interface

10  $\sqrt{3}$ -subdivision

Leif Kobbelt

July 2000

**Proceedings of the 27th annual conference on Computer graphics and interactive techniques SIGGRAPH '00**

Publisher: ACM Press/Addison-Wesley Publishing Co.

Full text available:  pdf(1.36 MB)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

A new stationary subdivision scheme is presented which performs slower topological refinement than the usual dyadic split operation. The number of triangles increases in every step by a factor of 3 instead of 4. Applying the subdivision operator twice causes a uniform refinement with tri-section of every original edge (hence the name  $\sqrt{3}$ -subdivision) while two dyadic splits would quad-sect every original edge. Besides ...

11 Access control in federated systems

Sabrina De Capitani di Vimercati, Pierangela Samarati

September 1996

**Proceedings of the 1996 workshop on New security paradigms NSPW '96**

12 Passive measurements: Pop-level and access-link-level traffic dynamics in a tier-1 POP

Supratik Bhattacharyya, Christophe Diot, Jorjeta Jetcheva

November 2001

**Proceedings of the 1st ACM SIGCOMM Workshop on Internet Measurement IMW '01**

Publisher: ACM Press

Full text available:  pdf(3.31 MB)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

In this paper, we study traffic demands in an IP backbone, identify the routes used by these demands, and evaluate traffic granularity levels that are attractive for improving the poor load balancing that our study reveals. The data used in this study was collected at a major POP in a commercial Tier-1 IP backbone. In the first part of this paper we ask two questions. What is the traffic demand between a pair of POPs in the backbone? How stable is this demand? We develop a methodology that combi ...

13 A high-level microprogrammed processor

Christian Iseli, Eduardo Sanchez

November 1990

**Proceedings of the 23rd annual workshop and symposium on Microprogramming and microarchitecture MICRO 23**

Publisher: IEEE Computer Society Press

Full text available:  pdf(587.32 KB)

Additional Information: [full citation](#), [abstract](#), [references](#)

This paper presents a microprogrammable processor, intended for small real-time applications, and the development system associated with it. The processor, designed for an optimal execution of a structured high-level language, has only one level of language: a microcode allowing the execution of three operations in parallel. The possible
